

Données, confidentialité et sécurité / Data, Privacy and Security

Version 1.1 - 11 August 2026

Data minimisation

The website should collect only what is necessary. Audience measurement is limited to aggregate traffic and technical quality; it is not used for advertising profiling.

Audience measurement

Swetrix and Umami are loaded to measure website traffic and technical quality. They are not used for targeted advertising, commercial profiling or session recording. Tawk is loaded only when a visitor requests a human handoff.

Security baseline

HTTPS, HSTS, CSP, restrictive HTTP methods, anti-scan rules and no directory listing are maintained in the server configuration.

Retention and access

Access to personal data should be limited to authorised persons and retained only for the period necessary for the stated purpose.
