

Rapport de restitution 2026 / Restitution Report 2026

Version 1.0 - 11 July 2026

Purpose

This report sets out the public method used by Fondazione Caravelli: listen, verify, act, document and return an account. It does not claim completion of actions beyond what is explicitly presented on the website.

Public project chapters

Acqua Prima - Burkina Faso: water, hygiene and school continuity. Il Quaderno - Nepal: education, materials and learning continuity. Casa Sospesa - Lebanon: protection, food support and family continuity. Each chapter must state status, territory, period, evidence and limits before publication.

Image ethics

Images are not treated as proof by themselves. Context, consent, rights and protection of minors must be verified before publication. Illustrative or art-direction images must be labelled as such.

Restitution commitments

Updates are dated. Claims are limited to verifiable scope. The Foundation distinguishes intention, preparation, action in progress and completed action.

Publication notice: this document states the Foundation's published principles and current public scope. It is not an audited financial statement, a statutory registration certificate, or independent third-party assurance.
